Fax. (08) 8260 2399

## Soil pH Products

**MTO8000**  
Soil pH Test Kit  
6 per carton

A simple, instant & economical kit to test the pH of soils, potting mix and compost. When used as directed, contents will do in excess of 100 soil tests.

### For lowering soil pH

**MTO0555**  
Sulphur  
Fine Granules  
500g

Acidifies alkaline soils by reducing pH.

500g each, 6 per carton.

### For increasing soil pH

**MBP0300**  
Garden Lime  
3kg

Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration, also used to enhance composting

3kg each, 6 per carton.

**MBP0308**  
Sulphur  
Fine Granules  
3kg

Acidifies alkaline soils by reducing pH.

3kg each, 4 per carton.

**MBP8180**  
Garden Lime  
8kg

Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration, also used to enhance composting

8kg each, 2 per carton.

**MTO1555**  
Sulphur  
Fine Granules  
1.5kg

Acidifies alkaline soils by reducing pH.

1.5kg each, 6 per carton.

**MBP8280**  
Dolomite Lime  
8kg

Rich in magnesium. Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration, also used to enhance composting

## Section 2 Soil Conditioners

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Soil Conditioners

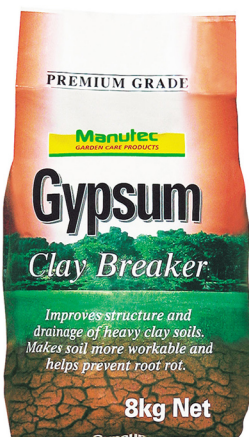

### MBP8080

#### Gypsum

8kg

Improves soil structure, aeration & drainage. Provides calcium & sulphur.

8kg each, 2 per carton.

### MBP8180

#### Garden Lime 8kg

Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration. Also used to enhance composting.

8kg each, 2 per carton.

### MBP0300

#### Garden Lime 3kg

Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration. Also used to enhance composting.

3kg each, 6 per carton.

### MBP8280

#### Dolomite Lime

8kg

Rich in Magnesium. Conditions acid soils by increasing soil pH to neutral. Improves drainage & aeration. Also used to enhance composting.

8kg each, 2 per carton.

### MBP0308

#### Sulphur Powder

3kg

Acidifies alkaline soils by reducing pH.

3kg each, 4 per carton.

#### Changing/Adjusting soil pH

##### Lowering pH of alkaline soils:

We recommend to use Manutec Sulphur which is the most common and economical soil acidifying product for lowering pH. To lower the pH by one unit (eg. from 7.5 to 6.5), use following amounts per square metre of soil surface, depending on soil type.

**Sandy - 25g/m<sup>2</sup> Loamy - 50-70g/m<sup>2</sup> Clay - 100g/m<sup>2</sup>**

These amounts will lower pH of top soil by one unit, to lower the pH by more than one unit, multiply the above amounts accordingly.

#### Increasing pH of acidic soils:

We recommend to use either Garden Lime or Dolomite Lime. Both are effective in increasing soil pH, but the difference is Dolomite has a higher Magnesium content which is ideal for highly acid soils.

To increase the pH by one unit (for example from 5.5 to 6.5) use the following amounts per square metre of surface area, depending on soil type.

**Sandy - 100g/m<sup>2</sup> Loamy - 200g/m<sup>2</sup> Clay - 300-400g/m<sup>2</sup>**

These amounts will raise the pH of top soil by one unit, to raise the pH by more than one unit, multiply the above amounts accordingly.

**Note:** Soils that are naturally acidic or alkaline need regular monitoring and correction.

**Note:** Sulphur is gradually converted to acid over a period of 4 - 6 weeks depending on soil temperature and microbial activity. It is most important to test the pH after this period and repeat the application if necessary.

Visit [www.soilphtesting.com](http://www.soilphtesting.com) for more details.

## Section 3 Organic Fertilisers

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Organic Fertilisers

### MBP0256 Blood & Bone Blend 2.5kg

Organic fertiliser & soil conditioner blended with Gypsum and added nutrients to provide balanced nutrition. Suitable & safe for use on all plants. Provides slow release organic form nutrients, improves soil structure & organic content.  
2.5kg each, 6 per carton.

### MBP8035 Blood & Bone Plus 8kg

(with Potash & Trace elements)  
Suitable & safe for use on all plants. Provides slow release organic form nutrients, improves soil structure & organic content.  
8kg each, 2 per carton.

### MBP0402 Organic Pellets 4kg

Organic based nutrient pellets suitable for all garden plants.

4kg each, 4 per carton.

Find us online at  
[manutec.com.au](http://manutec.com.au)

## Features & benefits of organic fertilisers

- Suitable & safe to use on all plants
- Provide slow release organic form nutrients, primarily rich in nitrogen & phosphorus
- Improves soil structure, aeration & moisture holding
- Helps to improve soil biological activity such as beneficial microbes, earthworm activity etc.
- However organic fertilisers are not generally rich in potassium and trace elements. Hence where organic fertilisers are used excessively, additional supplement of potassium & trace elements is recommended.

## Section 4 Water Soluble Fertilisers

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Water Soluble Fertilisers

### MTO2501 All Purpose Plant Food 250g

Balanced nutrients  
ideal for all plants.

250g each, 12/carton.

### MTO5005 Foliage Feeder 500g

Rich in Nitrogen to  
enhance green growth.

500g each, 6/carton.

### MTO2503 African Violet Food 250g

Ideal for self watering  
pots & violets.

250g each, 12/carton.

### MTO5004 Bloom Booster 500g

Rich in Potassium to  
boost flowering &  
fruiting.

500g each, 6/carton.

### MTO2504 Bloom Booster 250g

Rich in Potassium to  
boost flowering &  
fruiting.

250g each, 12/carton.

#### FAST ACTING, EFFECTIVE & SPECIFIC PROVIDE COMPLETE NUTRITION TO PLANTS

For a healthy garden, it is important to maintain the soils healthy and also regularly supplement with adequate quality nutrients. Fertilisers are plant food containing nutrients, not just chemicals, so feed your plants regularly & adequately to grow them healthily; don't make them to starve until the plants express their hunger symptoms. Depending on the conditions you are growing, choose the best form and type of fertiliser that suits your application method or convenience which minimises wastage and also effectively available to plant.

Manutec Soluble & Liquid Fertilisers are

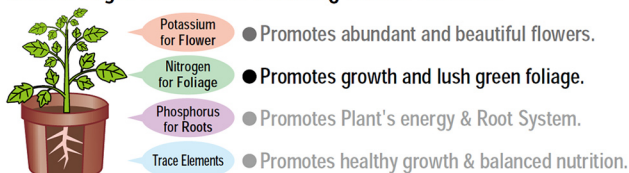

- Easy to dissolve or mix
- High analysis concentrated products
- Provide good value for money
- Get quick response upon application as they will be readily absorbed into the plant system.

Suitable for:

- Soil application (watering can)
- Foliar spray
- Drip/sprinkler Irrigation

#### Role of major nutrients in choosing correct fertiliser:

Plants normally absorb more nitrogen & phosphorus during initial growth stage to put up green growth & roots and later during flowering & fruiting period they take up more potassium. So choose the right product for right purpose at right time for better results.

Manutec has a wide range of soluble fertilisers suitable for specific purpose and plants. Products which are not on regular range can be supplied through special orders. Visit [www.solublefertilisers.com.au](http://www.solublefertilisers.com.au) for product details.

## Water Soluble Fertilisers

### MTO2502 Orchid Food 250g

Balanced nutrients  
for use all year  
round.

250g each, 12/carton.

### MTO5002 Orchid Food 500g

Balanced nutrients  
for use all year  
round.

500g each, 6/carton.

### MTO2508 Orchid Bloom Booster 250g

Rich in potassium  
to enhance spikes  
& colour.

250g each, 12/carton.

### MTO5008 Orchid Bloom Booster 500g

Rich in potassium  
to enhance spikes  
& colour.

500g each, 6/carton.

### MTO5007 Fruit & Citrus Food 500g

Specially  
formulated for  
fruit plants with  
added trace  
elements.

500g each, 6/carton.

### MTO5009 Hydroponic Nutrient 500g

Supplies all  
essential  
nutrients,  
ideal for all  
hydroponic  
culture.

500g each, 6/carton.

## Water Soluble Fertilisers

### MTO5078 Acidic Plant Food 500g

Soluble acidic fertiliser suitable for all acid loving plants.

500g each, 6/carton.

### MTO6712 Tomato Food 500g

Rich in potassium & chelated trace elements to promote bigger, healthier, tasty tomatoes.

500g each, 6/carton.

### MTO6713 Tomato Magic 1kg

Rich in Potassium & added calcium. Ideal for tomatoes and other related vegetables.

1kg each, 6/carton.

### MTO5010 Hydrangea Blueing 500g

Maintains nutrient levels required for blue sepals.

500g each, 6/carton.

### MTO5011 Hydrangea Pinking 500g

Maintains nutrient levels necessary for pink sepals.

500g each, 6/carton.

## Water Soluble Fertilisers - Bunnings Stores Range Only

### MTO6002 Orchid Food 600g

Balanced nutrients  
for use all year round

600g each, 8 per carton.

### MTO6008 Orchid Bloom Booster 600g

Rich in potassium to  
enhance spikes &  
colour

600g each, 8 per carton.

### MTO6010 Hydrangea Blueing Fertiliser 600g

Maintains nutrient  
levels & pH conditions  
required for blue sepals

600g each, 8 per carton.

### MTO601 Hydrangea Pinking Fertiliser 600g

Maintains nutrient  
levels & pH conditions  
required for pink sepals

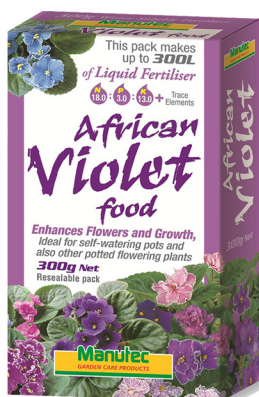

600g each, 8 per carton.

### MTO3503 African Violet Food 300g

Ideal for self watering  
pots & violets, enhances  
growth & flower.

300g each, 12 per carton.

### MTO6009 Hydroponic Nutrient 600g

Supplies all essential  
nutrients, ideal  
for all hydroponic  
culture

600g each, 8 per carton.

## Section 5 Granular Fertilisers

## Granular Fertilisers

**MBP0250**  
Garden Complete  
2.5kg

2.5kg each, 6 per carton.

**MBP8055**  
Garden Complete  
8kg

8kg each, 2 per carton.

**MBP0251**  
Rose Fertiliser  
2.5kg

2.5kg each, 6 per carton.

**MBP8015**  
Rose Fertiliser  
8kg

8kg each, 2 per carton.

**MBP0252**  
Fruit & Citrus  
Fertiliser 2.5kg

2.5kg each, 6 per carton.

**MBP8025**  
Fruit & Citrus  
Fertiliser 8kg

8kg each, 2 per carton.

**MBP0254**  
Azalea & Camellia  
Fertiliser 2.5kg

2.5kg each, 6 per carton.

**MBP8045**  
Azalea & Camellia  
Fertiliser 8kg

8kg each, 2 per carton.

## Granular Fertilisers

**MBP0255**  
Lawn Fertiliser  
2.5kg

2.5kg each  
6 per carton

**MBP8065**  
Lawn Fertiliser  
8kg

8kg each  
2 per carton

## Advantages of Granular fertilisers

- Easy to apply, no mixing
- High analysis & value for money
- Effective over a period of time

## Section 6

### Slow Release Granular Fertilisers

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Slow Release Granular Fertilisers

**MTO2245**  
Home Grown  
Vegetables  
Slow Release  
Granular 1kg

1kg each  
10 per carton

**MTO2246**  
Fruit & Flower  
Slow Release  
Granular 1kg

1kg each  
10 per carton

**MTO2248**  
Home Grown  
Tomato  
Slow Release  
Granular 1kg

1kg each  
10 per carton

**MTO2247**  
Home Grown  
Herbs  
Slow Release  
Granular 1kg

1kg each  
10 per carton

- Easy to handle and apply
- No mixing
- Provides slow release nutrients
- Safe and do not burn roots when applied as directed

## Section 7

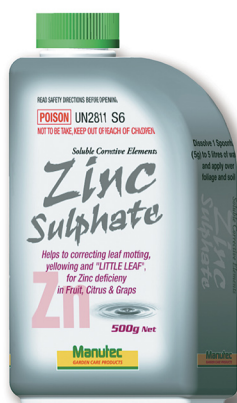

### Trace Elements & Corrective Products

## Trace Elements & Corrective Products

### MTO0511B Zinc Sulphate 500g

Zinc deficiency leads to leaf mottling & yellowing in younger leaves. Early Spring & early Autumn applications are effective to overcome deficiencies. 500g each, 6/carton.

### MTO0512B Zinc & Manganese 500g

Zinc & Manganese are the most required trace elements by citrus & vines. Regular application will maintain healthy growth, fruit yield & quality. 500g each, 6/carton.

### MTO0523B Iron Sulphate 500g

For overcoming Iron deficiencies in soils & potting mixes.

500g each, 6/carton

### MTO0522B Iron Chelate 300g

Highly soluble & effective in correcting iron deficiency.

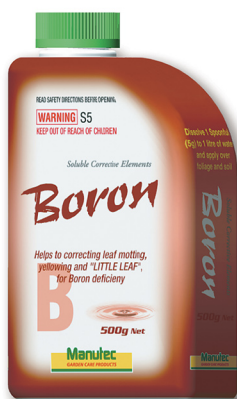

250g each, 12/carton

### MTO0544B Boron 500g

Boron deficiency causes 'Brown Heart' in fruits & vegetables & results in break down of tissues. Deficiencies are most common in alkaline soils.

500g each, 6/carton

### MBP1107 Iron Sulphate 1kg

For overcoming Iron deficiencies in soils & potting mixes.

1kg each, 6/carton

### MTO0533B Copper Sulphate 500g

Effective in correcting copper deficiency, which presents as yellowing leaves with dark green veins & eventually results in die back of growing tips. 500g each, 6/carton

## Trace Elements & Corrective Products

**MTO0555B**  
**Sulphur Powder**  
 500g  
 Supplies sulphur nutrient & is also an efficient acidifying agent to reduce the pH of alkaline soils. Important for acid loving plants.  
 500g each, 6/carton

**MBP0308**  
**Sulphur Powder**  
 3kg

Acidifies alkaline soils by reducing pH.

3kg each, 4 per carton.

**MTO0588**  
**Magnesium Sulphate 500g**  
 Supplies magnesium to correct deficiencies. Also commonly used as *Epsom Salt*.

500g each, 6/carton.

**MBP1105**  
**Epsom Salt 1kg**  
 (Magnesium Sulphate)

A completely water soluble fertiliser for correcting magnesium deficiency, commonly seen as yellowing of older leaves.

1kg each, 6/carton.

**MTO0500**  
**Potassium Sulphate 500g**  
 Soluble form of potassium important to enhance flowering, fruiting, as well as plant's resistance.

500g each, 6/carton.

**MBP1104**  
**Sulphate of Potash 1kg**  
 Best soluble & economical source of potassium, essential to encourage flowering, fruiting & plant resistance.

1kg each, 6 per carton

**MBP0266**  
**Sulphate of Potash 2.5kg**  
 Best soluble & economical source of potassium, essential to encourage flowering, fruiting & plant resistance.  
 2.5kg each, 6 per carton

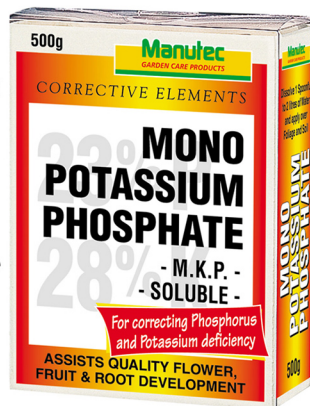

**MBP0404**  
**Sulphate of Potash 4kg**  
 Best soluble & economical source of potassium, essential to encourage flowering, fruiting & plant resistance.  
 4kg each, 4 per carton

## Trace Elements & Corrective Products

### MTO0566 Mono Potassium Phosphate 500g

Highly soluble & supplies phosphorus & potassium, both important to enhance root growth, flowering, fruiting & plant resistance to pests & diseases.  
500g each, 6/carton.

### MBP0156 Trace Elements Granular 1.5kg

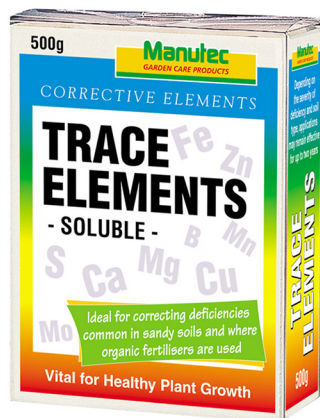

Easy to apply granular form and supplements all trace elements in one application.

1.5kg each, 6 per carton.

### MTO5006 Trace Elements 500g

Balanced mix of all trace elements in soluble form. Helps to overcome deficiencies of all trace elements in one application.  
500g each, 6 per carton.

### MTO5006B Trace Elements 500g

Balanced mix of all trace elements in soluble form. Helps to overcome deficiencies of all trace elements in one application  
500g each, 6 per carton.

### MTO0556 Dusting Sulphur 700g

Air floated dusting sulphur as a fungicide and miticide, gives a high degree of control of powdery mildew & mites.

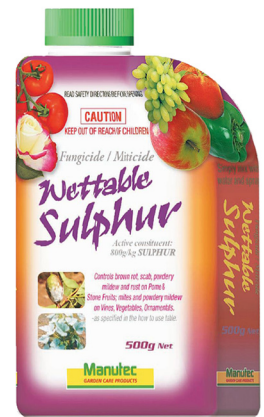

700g each, 6 per carton.

### MTO0557 Wettable Sulphur 500g

A soluble form of elemental sulphur which is easy to mix and spray and effectively controls powdery mildew, scab, rust & mites.

500g each, 6 per carton.

### R700 Root Clear 1kg

Effective in preventing & clearing root blocked sewer pipes. The large copper crystals penetrate & dissolve slowly to decompose roots.  
1kg each, 6 per carton.

### R800 Drain Clear 800g

Effective for clearing grease blocked drains. Simply mix recommended dosage with hot water & pour into sink.

800g each, 6 per carton.

## Trace Elements & Corrective Products

### MBP0264

#### Moss Killer & Lawn Food 2.5kg

Controls moss & feeds lawn in one application. Encourages grass growth to fill in bare patches left by dead moss.

2.5kg each, 6 per carton.

### MBP0564

#### Moss Killer & Lawn Food 5kg

Controls moss & feeds lawn in one application. Encourages grass growth to fill in bare patches left by dead moss.

5kg each

### MBP0200

#### Urea Soluble Prills 2kg

High Nitrogen soluble fertiliser. Stimulates lush green growth.

2kg each, 6 per carton.

### MTO0599B

#### Manganese Sulphate 500g

For correcting Manganese deficiency in plants which causes blotchy yellowing between the veins of young leaves.

500g each, 6/carton.

### MBP0263

#### Alum 2.5kg

Widely used for blue hydrangeas to acidify soils, to achieve blue colour.

2.5kg each, 6 per carton.

### MBP5550

#### Super Phosphate 5kg

Common & economical form of supplying phosphorus, essential for healthy root growth.

5kg each

### MBP0265

#### Sulphate of Ammonia 2.5kg

A quick response & economical form of Nitrogen Fertiliser. Promotes lush green growth.

2.5kg each, 6 per carton

#### Soil pH & nutrient availability

- Maintaining optimal soil pH is crucial to influence better root activity & absorption of nutrients.
- All nutrients are easily available to plants at the neutral pH of 6-7.
- Under alkaline conditions (above 7) zinc, Iron & manganese become less available.
- Under acidic conditions (below 5) nitrogen, phosphorus, magnesium and calcium become less available.

## Section 8 Liquid Fertilisers

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Liquid Fertilisers

### MTO3401

#### Easy Squirt: Green Leafy Plants

High in Nitrogen, encourages growth of healthy, leafy foliage.

400ml /bottle  
6 bottles /carton

### MTO3402

#### Easy Squirt: Flowering Plants

High in Potassium, encourages abundant colourful blooms

400ml /bottle  
6 bottles /carton

### MTO3404

#### Liquid Potash Plus 450ml

A booster for fruits & flowers. High Potassium to improve size, colour & quality of fruits & vegetables.

450ml /bottle  
6 bottles /carton

### MTO3404

#### Liquid Potash Plus 2L

A booster for fruits & flowers. High Potassium to improve size, colour & quality of fruits & vegetables.

2L /bottle  
4 bottles /carton

### MTO3425

#### Liquid Fertiliser for Veg & Herbs 2L

Supplies all essential nutrients in easily available liquid form for healthy growth of vegetables & herbs. Also suitable for use on general garden plants.

2L /bottle  
4 bottles /carton

## Advantages

- Easy to use
- Value for money
- Quick response
- Suitable for watering can, folier spray or drop.

## Section 9 Tablet & Spike Fertilisers

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Tablet & Spike Fertilisers

### MTO1001 Fertiliser Spikes Foliage Plants

Enhances growth of healthy leaf/foilage. Slowly feeds up to 60 days.

50 spikes /pack  
10 packs /carton

### MTO2002 Fertiliser Spikes Flowering Plants

Produces abundant & beautiful blooms. Slowly feeds up to 60 days.

50 spikes /pack  
10 packs /carton

### MTO6715 Water Garden Aquatic Plants

Ideal to feed all Aquatic plants.

20 x 10g tablets /pack  
12 packs /carton

### MTO6756 Planting Tablets Trees & Shrubs

High Nitrogen formula, ideal for landscaping, potting up & established trees & shrubs

20 x 20g tablets /pack  
6 packs /carton

### MTO6767 Planting Tablets Fruit & Citrus Trees

Rich in Potassium, ideal for feeding container plants & landscaping.

20 x 20g tablets /pack  
6 packs /carton.

### MTO6778 Planting Tablets Rose Bushes

Specific formula for roses. Ideal for planting new season roses & feeding established roses.

40 x 10g tablets /pack  
6 packs /carton

### MT06710 Tomato Tablets

Encourages bigger & healthier tomatoes.

20 x 10g tablets /pack  
12 packs /carton

#### Benefits of using Slow Release Spikes & Tablets:

- Ideal for all potted & container grown plants (both indoor and outdoor)
- Economical, easy, safe & convenient to use
- Eliminates messy mixing & complicated measuring
- No over feeding & no risk of burning
- Contain all essential nutrients & slowly releases for different period depending on the type & size
- No leaching or loss of nutrients & safe for the environment & waterways

## Slow Release Tablets 8KG Bulk Packs

### MTO6788

Tree & Shrubs 20g

2 Year Release

400 x 20g tablets  
Net weight 8kg

### MCPT10

Tree & Shrubs 10g

1 Year Release

800 x 10g tablets  
Net weight 8kg

### MTO6799

Fruit & Citrus 20g

2 Year Release

400 x 20g tablets  
Net Weight 8kg

### TABAQUAPLANT10

Aquatic Plants 10g

1 Year Release

800 x 10g tablets  
Net Weight 8kg

### MTO6720

Native Plants 20g

2 Year Release

400 x 20g tablets  
Net Weight 8kg

### MTO6700

Native Plants 10g

1 Year Release

800 x 10g tablets  
Net Weight 8kg

## Tablet Application Details

### APPLICATION OF 10G & 20G TABLETS

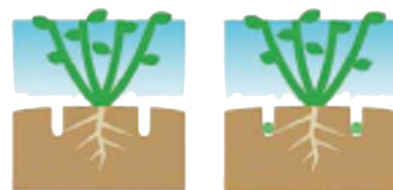

**FOR POTS:** Place the recommended number of tablets on the surface of the pot or soil along side of the pot rim, avoiding direct contact with the plant.

**FOR LANDSCAPING:** Determine the number of tablets required. Punch holes evenly around the dripline of plant (refer illustration). Make holes at least 10cm deep. Insert tablets into holes and cover with soil. Re-fertilise with new tablets approximately every 6 months. Water the plants after tablet application.

**USING TOMATO TABLETS:** When seedlings established, place one tablet on either side of each plant about 10-15cm away from the stem. Place tablets 10cm below, cover with the soil and water as usual.

### NUMBER OF TABLETS TO USE:

Pot Diameter	10g Tablets	20g Tablets
18-21cm	1-2 tablets	2 tablets
24-27cm	2-4 tablets	3-4 tablets
>35cm	6-8 tablets	5-6 tablets

**A** Determine how many tablets you need

**B** Make holes 10-20cm deep around dripline of plant

**C** Insert Tablet fertiliser. Water plant as usual.

## Section 10 Growing Media Products

Manutec PTY LTD  
30 Jonal Drive  
CAVAN SA 5094

[www.manutec.com.au](http://www.manutec.com.au)  
Ph. (08) 8260 2277  
Fax. (08) 8260 2399

## Growing Media Products

### MBP5850

#### Perlite 5L

Improves aeration & drainage. Ideal for hydroponic media, potting & propagating mixes.

5L each

### MBP1285

#### Perlite 12L

Improves aeration & drainage. Ideal for hydroponic media, potting & propagating mixes.

12L each

### MBP5950

#### Vermiculite 5L

Improves aeration & water holding capacity. Ideal for potting mixes, hydroponics & seed raising mixes.

5L each

### MBP1295

#### Vermiculite

Improves aeration & water holding capacity. Ideal for potting mixes, hydroponics & seed raising mixes.

12L each

### MBP5750

#### Sphagnum Moss 5L

Ideal as surface mulching to retain moisture, & for use as decorating effect for pots.

5L each

### MBP1275

#### Sphagnum Moss 12 L

Ideal as surface mulching to retain moisture, & for decorating effect for pots.

12L each

## Growing Media Products

### MBP5650 Peat Moss 5L

An excellent moisture retainer. Improves sandy & heavy clay soils which are low in organic matter. Ideal for mulching & potting mixes.

5L each

Find us online at  
[manutec.com.au](http://manutec.com.au)

## Manutec Commercial Fertiliser

**MANUSOL WATER SOLUBLE FERTILISER:** A wide range of MANUSOL water soluble fertiliser products are available with different NPK ratios and trace elements. Suitable for Fertigation, Drip Irrigation and Foliar Spray.

Many more NPK ratios available & manufactured to your specific requirements. Please contact Manutec for price & availability.

**WATER SOLUBLE AQUACULTURE FERTILISERS:** Manutec water soluble aquaculture fertilisers are highly effective in fostering growth of microalgae /phytoplankton in hatcheries and are based on F2 recipe. With and without silicate options are available depending on requirement of diatoms growth. Manutec has 3 different specialty soluble fertiliser for the aquaculture hatcheries to improve microalgae growth:

Micro Algae Food with Silicate: For abalone etc. which requires diatoms (based on F2 recipe).

Micro Algae Food without Silicate: For species which don't require diatoms

ABASOL Soluble Fertiliser: General purpose soluble fertiliser

Available in 25kg bags. Visit: [www.microalgaefood.com.au](http://www.microalgaefood.com.au)
